

LACO ATLAS Leak Test Process Controller Configurator Product Configuration

Please save a copy of this document for your records. This document will not be accessible again after you close it.

ATLAS™ is a flexible controller that allows for helium charging, evacuation, air proof testing, and decay testing of products for tracer gas leak testing. The standard controller can be configured for automated hard vacuum, HATS™, sniffing, and accumulation helium leak testing methods. ATLAS is designed to integrate with LACO's TITANTEST™ Helium Leak Detector to create an automated leak testing system.
