## VACUUM DEGASSING SOLUTIONS

LACO Vacuum Degassing Systems are complete, economical and efficient solutions for your vacuum application. Choose from portable cart-mounted or table-top systems. Ideal for improving products or processes that use epoxies, urethanes, resins, silicone, adhesives, castings, plasters, or any compounds used for jewelry, medical or electrical devices. If your manufacturing process needs an effective degassing solution, LACO should be your first stop.

VDS182005HS

### STANDARD FEATURES

LACO offers several standard vacuum degassing systems ideal for degassing 5 gallon pails. All standard systems include:

- Tabletop or cart mounted options
- Stainless steel chambers
- Full viewport clear lids
- Manual ball valves
- Absolute style digital torr vacuum gauge
- 0-30 inHG analog vacuum gauge
- High vacuum rotary vane pumps
- Oil mist exhaust filters
- Clear inlet vacuum traps

### CUSTOM FEATURES

LACO also offers custom size degassing chambers for vacuum degassing of bulk oils or even 55 gallon drums. Custom system options include:

- Vacuum rated electric mixers
- Heated chambers
- Fully automated PLC controlled systems
