

## LACO Technologies Announces New Website Launch

Redesigned corporate website includes divisional websites  
for enhanced customer experience

MARCH 11, 2021 | LACO TECHNOLOGIES

**SALT LAKE CITY | March 11, 2021** | LACO Technologies, a leading manufacturer of vacuum and leak test solutions, is excited to announce the launch of our newly redesigned [lacotech.com](https://lacotech.com) website along with two divisional websites dedicated to [LACO Vacuum Solutions \(LVS\)](#) and [Leak Test Solutions \(LTS\)](#).

The new website structure incorporates numerous new features including unique sub-domain websites for Vacuum Technology and Leak Testing applications, responsive design for mobile devices, and a streamlined product interface for an improved customer experience.

“In an effort to better serve our broad customer base, LACO recently restructured our operations into two unique divisions centered around technology and customer applications,” explained Paul Chamberlain, CEO and President of LACO Technologies. “The creation of these divisional websites provides our customers with a greatly enhanced website experience, enabling them to easily locate the products and solutions specific to their applications and requirements.”

The ultimate goal of LACO’s new website – and associated divisional websites – is to provide customers with relevant and engaging content which is easy to locate and utilize. The addition of a video library, new product page layouts, and a wide range of technology/product resources provides customers with the information they need when looking for the perfect solution. Coming in Q2 of 2021, eCommerce functionality will further enhance the customer experience with the ease of online purchasing of products.

Furthermore, the individual websites provide social media links to our LinkedIn, Facebook, Twitter, Pinterest, and Vimeo/YouTube pages to better communicate and interact with customers. Users can also interact with our customer support staff via live chat during normal business hours, and for customers with a [PM Service Agreement](#), we offer [24/7 Support](#) to keep their systems up and running.

Check out our new website today!

## **About LACO Technologies**

LACO Technologies, Inc. is a leading manufacturer of vacuum and leak testing systems. Driven by innovation, service, and quality, we strive to be the best provider of standard and custom vacuum and leak testing solutions.
